NEW E71T-1 ELECTRODE WITH EXCEPTIONAL WELDING PERFORMANCE

Fort Loramie, OH - Select-Arc, Inc. has introduced an E71T-1 flux cored, gas-shielded electrode that is specifically designed for enhanced welder appeal and superb weldability over a broad range of parameters.

Select 707 is an all position wire that provides excellent weldability at low or high current settings while exhibiting an exceptionally smooth spray transfer and outstanding arc stability. This select electrode also delivers robust mechanical properties at subzero temperatures as low as -20°F.

Select 707 is ideal for a wide variety of welding applications including general fabrication, structural steel, construction equipment, railcar fabrication and shipbuilding.

This premium electrode is available in .045", .052" and 1/16" diameters.

For more information on Select 707, contact Select-Arc at 1-800-341-5215 or visit our website at www.select-arc.com.
